SPA & WELLBEING

YOUR AURA SPA JOURNEY

Drawing inspiration from ancient Asian traditions, our menu targets six Journeys for achieving true wellbeing

Nature is extraordinarily generous. It nourishes and heals, grounds and protects. Like the ancient civilisations who came before us, we know that harmony and balance need not come from something designed in a lab. The answers are found all around us – in our seas, our gardens and the earth upon which we live.

That's why Aura Spa & Wellbeing was designed with nature at its core. We make many of our products with healing ingredients picked fresh from our islands – salt is harvested from our seas, turmeric is grown in our permaculture gardens, and aloe vera is plucked from our forests. Partner products are made in Indonesia following European standards of natural skincare and are free of parabens, mineral oils, silicones and artificial fragrances.

CONCEPT

Our menu is divided into six distinct journeys. To find the right treatment, answer this question: Which word describes what you most need now in your life?

RESTORE	PURIFY
PROTECT	GLOW
BALANCE	BREATHE

Now choose from our offerings created to meet your goal through physical touch, mental wellbeing and the curative power of Mother Earth.

Any single treatment from the following menu can be used as a guest's daily stay entitlement. Additional treatments, Spa Explorer and Packages are chargeable.

Let's start your journey...

ESSENTIAL OIL JOURNEYS

Essential oils are often described as the true “essence” of plants. These highly-concentrated oils are distilled or extracted to capture the powerful healing properties of nature. Simply smelling them can alter your mood. Here are our four favourite essential oil blends, each made with the goal to enhance your personal journey with us today.

LAVENDER & TONKA BEAN

Indulge in a moment of peace and relaxation. The warm, meadow-like aroma of the tonka bean – a favourite of many major perfume makers – is subtly sweet and summery. The absolute blends beautifully with the tranquil smell of lavender to create a mesmerising mix that aids in relaxation, sleep and stress relief. This scent stimulates olfactory nerves to slow down the central nervous system and induce an all-embracing sense of peace.

ROSE & PETITGRAIN

Known as the “queen of all flowers”, rose has been prized for centuries as a perfume, medical remedy and symbol of everlasting love. The sweet floral bouquet of this absolute also delivers skin soothing and anti-aging properties. Petitgrain is derived from the leaves and twigs of orange trees, which imparts a wonderful woody and slightly citrusy scent that can lift spirits and calm anger.

ORANGE & GINGER

The sunny, vibrant scent of sweet orange coupled with the richness of fresh ginger awakens the senses. Orange essential oil brightens the skin and helps to ease depression, while spicy ginger essential oil is known to drive feelings of empowerment and courage. This is a blend for those ready for exploration and hungry for discovery.

MINT & LIME

The cool refreshing aroma of peppermint essential oil is matched only by its powerhouse medicinal properties; it’s used to clear congested skin, soothe aching muscles and stimulate mental clarity. When merged with the zest of lime essential oil, this lively and uplifting blend awakens your mind and inspires positive thoughts.

RESTORE

A life well lived through the passage of time, a dedication to exercise and days spent soaking in nature require a dose of restoration every now and again. Just like Bawah's ecological efforts to accelerate the recovery of our ecosystem, these treatments are aimed to return you to a previous state of time gone by.

The result of a half hour session is an invigorating sense of wellbeing – akin to a runner's high without the run.
