ABOUT ALAYA SUITES

Alaya Suites is the newest addition to the Alaya Hotels & Resorts collection, offering a modern sanctuary in the heart of Ubud. Surrounded by nature's quiet beauty, the property blends sleek design with the spirit of Balinese folklore, crafting an imaginative escape for the contemporary explorer.

Born from Bali's landscape of ceremony and craft, Alaya Suites lies within the artistic flow of Pengosekan. This part of Ubud balances movement and calm. The neighbourhood is dotted with art galleries, cafés, craft shops, and yoga studios, offering a rhythm where creative expression and mindful living naturally intertwine.

Featuring **45 elegant suites** and **6 one-bedroom villas**, Alaya Suites is alive with creativity. A space where the art of nature, layered textures, and gentle storytelling come together to redefine refined living in Bali's cultural landscape.

DREAM OF ALAYA

Alaya Suites is designed around the Balinese principle of **Catus Patha**, a traditional concept that sees the intersection of life, ritual, and community as the heart of a village. This philosophy is reflected in the layout of the property, where key spaces echo the four sacred components of a Balinese settlement.

Inspiration is drawn from **Wayang Bali**, the intricate shadow puppetry art form known for its layered narratives and curved silhouettes. This influence is expressed through the resort's use of curves, textures, and layered forms.

Each floor is shaped by one of five natural elements: water (sagara), earth (bhumi), living beings (jiva), air (akasha), and light (surya).

DREAM OF ALAYA

These themes are translated into spatial experience through the grounding presence of Bandung Grey marble for floors and vanities, handcrafted natural stone walls, locally sourced andesite stone, teak wood furniture, and recycled ulin wood amenities.

Lighting and finishing touches include handcrafted lampshades made from pineapple and banana paper, artisanal bamboo crafts from West Java, and custom lino-cut artworks by

Balinese artist Septa Adi. The atmosphere is grounded by earthy tones, natural textures, and soft recycled fabrics that bring warmth to the space.

This approach is unified under the **“Dream of Alaya”** concept, which connects cultural memory and contemporary guest experience through material, mood, and meaning.
